

SERVICE LLOYDS

INSURANCE AND FINANCIAL SERVICES

LOSS CONTROL SAFETY VIDEOTAPES

Service Lloyds Insurance Company maintains a video library of tapes containing valuable information on loss prevention and loss control. The tapes, most five to twenty minutes in length, are available for loan, free of charge, to any/all policyholders. Videotapes may be ordered by contacting your local Loss Control Representative, Marketing Field Representative, or the Loss Control Department contact - Lauren Kearbey, (800) 299-6977, ext. 3799. We ask that you view and return the tapes within 2 weeks of receipt; however, all tapes must be returned on or before due date provided. **Some video's may now be available on DVD. Please inform us of your preference and DVD's will be sent if available.**

You may also call Lauren Kearbey at the above number to check on availability. Currently our list includes:

VIDEO #	VIDEO TITLE	LENGTH	DESCRIPTION
Accident Investigation/Prevention			
3	Accident Investigation - The Accident: What to Do	14:00	This creative video program reviews the basic steps for investigating an accident effectively. This is the key to making sure the same accidents don't happen again! Includes information on assembling an accident investigation kit, gathering evidence and key points in interviewing witnesses. Comes with post video quiz
4	Accidents: It Can't Happen to Me	9:30	Are your employees aware that human life is fragile? Remind them bad luck plays no part in accidents. They can be controlled and prevented. Real-life examples promote personal responsibility for safety.
61	How to Investigate an Accident	13:00	All accidents, however minor, should be investigated to see patterns and prevent future accidents. Topics include: collection of facts: interviews, photos, equipment inspection; analysis: assigning codes, maintaining databases, looking for patterns, recommendations; and typical investigation scenarios.
78	No Injury, No Accident?	14:47	This video illustrates that, even though an accident may not have lead to an injury, steps must still be taken to prevent future such occurrences before they become injury accidents.
88	Pro-Active Safety Attitudes: Target Zero (ENGLISH OR SPANISH)	17:00	Zero accidents in the workplace is a possibility - and it all starts with a vision. This video uses astronaut Buzz Aldrin to emphasize the importance of pro-active safety by reminding us there was once a time when the possible seemed impossible! Topics include: accident prevention, building trust and maintaining leadership.
91	Returning the Injured Worker to the Job	20:33	Returning the injured worker to work reduces lost work days and claims costs and increases your bottom line. This video highlights the benefits of returning your injured workers to work, even in a modified position, and makes suggestions on implementing a Return to Work program.
92	Safe & Awake	14:45	Make sure employees are aware of, and respect, potential hazards and that they work as a team to achieve an accident-free environment. (humorous)
97	Safety Orientation	5:40	Avoid accidents due tot inattention or short cuts. Provide counseling, stating consequences and time allowed for behavior correction. Training and authorization required for use of equipment and chemicals. Rules of fire prevention. Prevention of back injuries.
101	So it Won't Happen Again	15:32	This video describes the steps that an employer should take while investigating an accident.

102	Some Mistakes Last Forever (SPANISH or ENGLISH)	18:00	The victim of the graphic accident portrayed in this program was a seasoned employee who should have known what the consequences of cheating a machine guard could be. The mistake Arnold Blakely made cost him more than a couple of fingers and part of his hand - it cost him a good paying job, his house, and his marriage, as well as his health when he became an alcoholic. This program will get your employees' attention and help them understand why it's necessary to follow safe work practices.
108	Supervisors' Development Program: Accident Investigation		Presents the importance of following a thorough, step-by-step procedure when investigating <u>all</u> workplace accidents, including near misses.
111	The Accident: What to Do	14:00	This creative video program reviews the basic steps for investigating an accident effectively. This is the key to making sure the same accidents don't happen again. Topics include: assembling an investigation kit; gathering evidence; key points in interviewing witnesses.
114	Training Program: Accident Investigation for Supervisors	25:00	Cover an in-depth accident investigation from start to finish. Train supervisors to develop the "hands-in" skills needed to conduct faster, more thorough and better-organized investigations: Initial response to an accident; collecting evidence. Determining cause of accident. Preventing future accidents. Comes with "Investigators Guide".
121	Training Program: Practical Accident Investigation Series		Investigation of accidents and incidents involves the methodical examination of an undesired event that did, or could, result in harm to people, damage to property or loss to process. Investigating all accidents/incidents, as outlined in this program, contributes to the identification of the basic causes, corrective actions and preventative controls. This program consists of four videos: The Initial Response, Gathering Evidence & Information, Analysis & Correction, and The Scenario Reel. Comes with Discussion Leader's Guide and Participants Worksheets.
129	Training Program: Accident Investigation in the Workplace: Supervisor Training and Employee Awareness		This program examines accident investigation for both employees and supervisors. It focuses on understanding the significance of accident investigation, the role of the investigator, gathering data, interviewing witnesses, and compliance with company policies and OSHA regulations. The program consists of 2 videos as well as workbooks for employees and supervisors.
Alcohol/Drug Awareness:			
2	A Supervisor's Guide to Dealing with Employee Drug and Alcohol Abuse	29:00	This video trains managers in how to deal with employees who have drug or alcohol problems, and discusses the economic impacts this problem produces. The goal of this program is to provide the information and motivation needed for supervisors to identify potential problems, document behavior as it relates to job performance and confront a troubled employee in a constructive manner. Comes with Instructor's Manual.
Auto/Driving			
19	City Driving (Trucking)	19:26	Short ATA produced video points out unique hazards to be aware of in urban areas.
27	Driving Defensively 1	5:00	Don't become blind to dangers of daily driving. Carelessness and overconfidence can wreck your auto and your life - presume the worst. Comes with post-video test.
28	Driving Defensively 2	5:00	Tips on how driving defensively prevents accidents. Comes with post-video test.
29	Driving Safely: Reason on the Road	15:08	Help employees achieve "perfect driving" by anticipating and acting to prevent accidents. Includes: Four-step accident prevention formula. Stopping distances: reaction, braking and stopping times for 20 mph vs. 40 mph. Complete inspection checklist for vehicle. Cautions driving: intersections, railroad crossings, lane changes, etc. Other considerations: children, weather.

30	Driving Safety	15:50	Motor vehicle crashes are the #1 cause of death on the job! Don't let employees take driving for granted: Inspect vehicle, adjust equipment, and use seatbelts. Mental preparation and concentration. Use a "safety cushion." Driving tips: passing, night driving, adverse weather, skidding and hydroplaning. Accident procedures.
31	Driving Techniques		Demonstrates proper driving techniques and explains how to handle specifics like right and left hand turns, intersections, underpasses, railroad crossings, merging, and passing.
66	Intersections	5:00	Intersections are the most dangerous driving situations in the city. Learn some easy to apply techniques to significantly reduce the likelihood that you will be involved in an intersection accident. Comes with post-video test.
86	Pre-Trip, On-the-Road, and Post-Trip Inspections		This video discusses the proper tractor-trailer inspection procedures from start to finish including cargo inspections.
87	Pro Driving Attitudes		Demonstrates four attitudes characteristic of professional drivers: being alert, being wary of other drivers and pedestrians, being patient with other drivers and driving conditions and being considerate of other drivers.
103	Speeding Cars	5:00	Speeding is a national epidemic. It's deadly, it's everywhere. The viewer is motivated to make a life-saving decision - not to speed. Comes with post-video test.
112	Training Program: Coaching the Experienced Driver - Defensive Driving Course		Comprehensive coverage of collision prevention techniques and issues, including: cushion of safety, scanning, vehicle positioning, following and stopping distances, backing and parking procedures, and others. Comes with Response Book, Leader's Guide, and written test.
123	Training Program: Speed & Space Management (Trucking)	9:15	Arm your drivers with the speed and space management "know-how" they need to avoid accidents. Proper speed and space management on the part of your drivers can go a long way toward keeping your accident rate - and your costs - low. This kit will give your drivers solid information on proper control of speed and "safe space" maintenance. It will also remind your drivers of what can happen when speed and space management is not practiced. The kit's fast-paced, 12-minute video features 3-D animation, dynamic sound, and upbeat music to capture and hold your drivers' attention. The video also features practical advice from veteran drivers and other industry professionals to add credibility and a "real-life" dimension. Comes with Instructor's Bulletin and Driver's Skill Card.
124	Training Program: Winter Driving	12:00	When old man winter comes to town, motor vehicle accidents increase dramatically. Icy roads, cold temperatures, and snow dramatically change everyone's driving environment. Our expert stunt drivers demonstrate safe driving techniques during inclement weather conditions. Keep your employees safe and reduce winter driving incidents with this exciting program. The video includes: following and stopping distance; braking and skid control; driving on inclines; braking safely; parking lots and potential hazards; vehicle maintenance and inspection. Comes with Facilitator Guide and Employee Handbook.
126	Vehicle Backing (Trucking)	13:30	Covers the basic elements of backign (the most commoncause of drivers' incidents and crashes) and features procedures to fillow for safe jacking, chasing, blind side backing, and more.
Auto Shop Saftey			
6	Auto Shop Safety #1	22:25	Educate your employees about the importance of following safety rules. Topics include: safe auto lifting procedures; storage and care of tools; fire hazards - combustibles, electrical shock and explosives; and asphyxiation, chemical burn and industry-specific safety tips. Comes with Video User's Guide.
7	Auto Shop Safety #2	22:03	Stresses that if safety rules are not followed in an auto shop, serious injury or death can occur. Running engines, moving cars, cars on jack stands or floor jacks, open fuel lines, and other things all have the potential to cause a catastrophe. Methods for preventing accidents are shown and emphasized.

98	Shop Safety	17:00	Every shop is full of potentially dangerous machinery and other hazards. Encourage personal safety awareness. Fire: flammable storage, extinguishers. Electrical shock: grounding, cords, liquids. Explosions: compressed gas, pressurized cans, lighting furnaces/foundries, batteries. Asphyxiation: air filtration, PPE, soldering. Physical injuries: PPE, safe lifting, chemical burns, housekeeping, kill switches. Tool/machine safety.
Back Injury Prevention/Lifting/Material			
9	Back Care & Safety	15:00	Back injuries can happen to anyone. Teach your employees about the back and its care. Topics include: back structure - components and normal curve; damage- weak spine, improper lifting, twisting, falls; S curve protection - sitting, standing, and sleeping positions; stretching; taking breaks; and diet and stress management.
10	Back in Step: The Road to Recovery from Back Pain		Offers tips and techniques that reduce demands on the back and promote recovery. Module One is an overview of the stages of recovery and discusses how participating in basic activities impacts this process. Module Two walks viewers through a wide variety of daily activities and demonstrates "less demanding" techniques that promote recovery.
11	Back Injury Responsibility (SPANISH)	9:21	Your employees must remember their backs at all times to prevent injuries. Encourage personal responsibility: back components and disk pressure; twisting and dropping carried objects; exercise and maintaining healthy weight; safe lifting: 10-to-1 ratio, safe lifting zones, mechanical assistance, back supports.
18	Chains, Slings and Hoists	13:00	Reviews safety issues related to the use of cranes, slings and chains.
23	Danger: Hazardous Duty (Loading Dock Safety)	4:32	Short video highlighting the hazards present in loading docks and the importance of safety awareness when working in them.
26	Don't Be a Dummy About Back Safety (SPANISH)	14:00	In this video from our "Don't Be A Dummy" Series, employees (and dummies) return to work for Back Safety Awareness Day. Our dummies suffer several painful back injuries despite the company's effort to make employees aware of the actions they can take to prevent them. Embedded in these injuries is a message to viewers: back injuries don't happen to dummies; they happen to real people who ignore basic back safety practices. Topics include components of the spine, causes of back injuries, back strains and sprains, and the importance of exercise and posture in maintaining a healthy back.
65	Indoor Cranes (SPANISH)	22:00	This video program is specifically designed for non-licensed operators to give them the knowledge they need to safely operate several types of cranes. Topics include: pre-operation safety inspection, rigging techniques and lifting and moving.
93	Safe Lifting	5:00	Backache causes: inflammations, injuries, aging of spinal disks. How the back works. The "lever principle" of lifting. Lifting in non-ideal situations.
94	Safe Lifting with Flex Supports	10:36	Back supports help your employees use safe lifting techniques. Anatomy of the back: importance of disks and ligaments, injuries, 10:1 ratio for safe lifting. Safe lifting: warm up, lifting, setting down, avoid twisting or stretching, other tips.
96	Safety Guidelines for Unit Handling Conveyors	20:00	Outlines 12 recommendations for safer operation and maintenance of unit handling conveyors. Recommendations are dramatized in live action vignettes presented by professional actors.
115	Back Safety Training Program	17:25	Five key areas addressed - correct posture, lifting formula and proper lifting techniques, personal protective equipment for back support, the role of proper diet in injury prevention, and stretching exercises for strengthening the back.
125	Understanding Low Back Pain	12:00	This video discusses the anatomy of the back, causes of back pain and ways to prevent injury to your back.

Safety Meetings			
33	Effective Safety Meetings	5:00	Get the most out of work-hours spent on training by sharpening your skills at creating highly effective safety meetings. Comes with post-video test.
36	Employee Safety Orientation	23:00	This up-to-date program covers policies and procedures in a variety of different work environments. Including: smoking; alcohol and drug usage; drug testing; violence; sexual harassment and emergencies. Designed for discussion breaks! Specifics included: proper lifting, inspections and investigations, reporting injuries and bloodborne pathogens.
37	Employee Safety Orientation for Food Service	14:00	Employees must be aware of safety concerns and act accordingly. Learn personal responsibility. Topics include: need for attention and alertness to avoid injuries; fire safety, safe lifting, slips, trips and falls; cut and burn prevention.
Electrical Safety			
34	Electrical Safety – The OSHA Regulations	15:21	Satisfy the OSHA training requirements under 1910.331 for “non-qualified” employees. Provide information employees need to work safely. Topics include: electricity, fuses, circuit breakers, grounding, GFI; equipment: outlets, plugs, extension cords and ladders.
35	Electrical Safety and Related Work Practices	14:00	This safety video is designed to meet OSHA requirements for training authorized and non-authorized personnel in electrical hazards. Mandatory requirements for training employees not only working with electricity, but employees who operate electrical equipment.
Ergonomics			
21	CTD Prevention for Employees	16:00	Cumulative trauma disorders cost companies an estimated \$25-40 billion each year. Fortunately, many cumulative trauma disorders can be avoided with a simple, pro active approach to creating a healthy work environment. This comprehensive program arms your employees with valuable, ergonomically correct information, helping them to understand what cumulative trauma disorders are, their causes, and most importantly, how to prevent injuries from occurring.
22	Cumulative Trauma: Reducing the Risk	48:00	Consists of four modules which discuss what cumulative trauma is, what causes it and what can be done by employers and employees to prevent and correct it. Comes with Self-Help Manual
38	Ergonomics	11:25	Reduce discomfort and injury caused by at-risk workstation postures with this excellent presentation by a Certified Professional Ergonomist: Actual case studies of ergonomic problems. How to properly set up a workstation. Parts of the body affected.
77	Medical Management of CTD	15:00	With cumulative trauma disorders costing companies an estimated \$25-40 billion each year, management needs to be acutely aware of effective cost control strategies. This comprehensive video provides need-to-know information your company shouldn't be without, including information on the most effective cost control strategies. Topics include: cost control strategies for managing injuries; effective workers' compensation case; management methods; return-to-work rehabilitation; exercise programs; and improved employee communication.
79	Office Ergonomics	15:10	This video covers the role of ergonomics in a healthy office environment, what cumulative trauma disorders and their causes are, and preventative measures to ensure a healthy office environment. Comes with companion booklet.
113	Training Program: Computer Ergonomics - The Joyce Institute Approach	31:00	Ergonomic strategies for computer users to help prevent injuries and increase productivity. Produced by the Joyce Institute, internationally-recognized specialist in ergonomics training and consulting, this new program demonstrates "do-it-yourself" strategies for improving comfort. This program illustrates a broad range of computer uses; highlights ergonomics workstation issues in offices such as lifting and storage; and focuses on low-cost/no-cost solutions that work. Comes with Leader's Guide and Participants Guide.

Fire Saftey			
40	Fire Extinguisher Training	6:00	Saving lives vs. property: Know priorities; classes of fires. Extinguisher inspection. Extinguisher operation: PASS method.
41	Fire Extinguishers: How & When to Use Them	15:00	Employees have two very important decisions to make when a fire breaks out: whether to flee immediately and which type of fire extinguisher to use if they decide to fight the fire. Prepare employees to make these determinations and learn the safe operating procedures for various types of extinguishers. Types and Identification of fire extinguishers. When not to fight a fire. 4 classes of fires and The PASS system.
First Aid			
12	Basic First Aid (SPANISH)	12:15	Train staff to respond quickly to injuries! Covers initial workplace treatments for cuts, burns, strains, sprains, fractures, shock and heat sickness, and heart attack, including CPR motivation.
42	First Aid on the Job: Initial Response	26:00	Designed specifically for those who may not be first-aid certified, but may be first on the scene of an accident. Topics include: when and how to move a victim, stopping bleeding, symptoms of shock and prevention, and awareness of bloodborne precautions.
Forklift Saftey			
116	Forklift Safety	20:30	This training program is designed to assist employees in becoming authorized forklift operators. After completion of this program, employees should be able to explain the importance of forklift safety procedures and demonstrate safe forklift operation.
117	Training Program: Forklift Safety Compliance Package (ENGLISH/SPANISH)		In an effort to decrease the staggering number of injuries and fatalities, OSHA finalized the new Powered Industrial Truck Standard (1910.178). This Forklift Compliance Package offers you the chance to comply with the latest training requirements. The compliance package includes two video programs, an employee handbook that corresponds to each video program and a Compliance Guide.
122	Training Program: Forklift – Lift Truck (ENGLISH/SPANISH)		This program is about safety training. It will not provide operational training on your specific forklift or powered industrial truck. Topics include: OSHA’s forklift safety requirements, basic safety precautions for driving in facilities, proper procedures for safe load handling, and safety precautions for special situations such as mechanical breakdowns and operation in hazardous environments. Comes with Facilitator Guidebook, and Participant Workbook in spanish and english
132	Training Program: Forklift Saftey - An Operator Training Program		This program covers forklift saftey procedures, safe forklift operation, pre-operation, load handling, fueling, battery change/charge, and mainentance. The video comes with a course preperation guide, employee handbook, and checklists.
Hand & Power Tools			
45	Grinding and Abrasive Wheels (SPANISH)	11:00	Grinding can be a safe job or a hazardous job. Why the difference? If you ignore safety and proper grinding procedures, you turn a safe job into one that is extremely dangerous. This program is intended to make personnel who use grinders more aware of safety when operating grinders.
46	Hand and Power Tool Safety for Automotive Mechanics	17:40	Encourage personal responsibility for safety and professional tool use. Includes PPE and electrical safety (double insulation, grounding, damaged cords, water safety). Drills, bench grinders, cheater bar probation. Torquing: calibration, torquing lug nuts.
84	Portable Grinders & Abrasive Wheels (SPANISH)	13:00	Grinders and abrasive wheels are common and dangerous tools. If improperly used, grinders can explode like hand grenades. This video explains safe use, procedures, and maintenance of grinders and abrasive wheels.
106	Supervisors' Development Program: Hand Tools and Portable Power Tools		Emphasizes that using the right tools <u>and</u> training workers to use them properly can prevent accidents and injuries.
Hazardous Materials/Hazcom			

32	Drum Handling Safety	15:45	Discusses the proper procedures for moving drums safely.
44	Gas Cylinders - Welding, Cutting and Brazing *	5:00	Cylinders used in welding, cutting or brazing operations can contain dangerous gases under high pressure. Rough handling, exposure to electrical circuits or heat sources, and improper storage can lead to accidents. Familiarize yourself with the dangers. Take precautions when handling, using or storing gas cylinders. Comes with post-video test.
47	Hazard Communications	5:29	Labeling of all chemical containers. MSDS and their use. Avoid mixing chemicals. Taking safety home.
48	Hazard Communications (SPANISH)	19:00	Designed to provide important information about safe work practices when working with hazardous chemicals. Topics include: awareness, attitude and action; MSDSs; and exposure limits.
49	HazCom: KHAZ Talk Radio	17:27	The most comprehensive compliance and training kit available. This video takes a fresh and entertaining approach to convey practical information that every employee should know before working with chemicals. Identifying chemicals; reading chemical labels. MSDS, including the 16-part ANSI MSDS. Proper storage of chemicals; emergency procedures.
51	Herbicide Selection & Safe Use (SPANISH)	14:00	An in-depth examination of safe and effective weed control, with emphasis on in-field safety: special site and environmental factors; choosing equipment, clothing and herbicides; storage, disposal and spills of herbicide.
54	High-Impact Hazard Communication Training (SPANISH or ENGLISH)	19:00	The eight accident re-enactments in this video show viewers that failure to understand chemical hazards on the job often results in horrific, life-altering injuries. The video stresses the point that workers must follow all safe work procedures outlined in the company's Hazard Communication program to prevent tragedies such as these. Training topics include reading container labels, understanding Material Safety Data Sheets, selection and use of PPE, proper storage of chemicals, health effects of exposures, routes of entry, emergency evacuation and warning signs.
131	Training Program: Hazard Communication - Training for Employees		This program covers chemical inventory, MSDS, labels and labeling. The video comes with and instructor's guide, employee workbook, and handouts.
Blodborne Pathogens			
14	Bloodborne Pathogens for Non-Healthcare Employees (SPANISH)	11:47	All employees, even those that are not considered high-risk, must become aware of the hazards of bloodborne pathogens. Topics include: transmission routes; preparation for emergencies, and first aid; housekeeping and waste disposal; definition of bloodborne pathogen, HBV, HIV, AIDS.
15	Bloodborne Pathogens for Manufacturing (SPANISH)	12:00	This program explains what bloodborne pathogens are, how they may affect workers and how to prevent exposure. Topics include exposure possibilities, exposure prevention, and cleaning and sanitizing.
16	Bloodborne Pathogens: Industrial	20:00	Critical protective BBP techniques. Meet training requirements under OSHA 1910.1030. Help industrial manufacturing employees apply critical techniques in accident/first aid situations. Topics include: definition of bloodborne diseases; sanitation issues; workplace transmission and exposure reduction; and safe work practices, PPE and housekeeping.
17	Bloodborne Pathogens: Protect Yourself (SPANISH)	15:00	This program is designed for workers who are not designated to respond in an emergency but may contract bloodborne pathogens as first-on-the-scene good samaritans, housekeeping employees or laundry staff. Topics include: HBV, HIV and AIDS; how these diseases are spread; first-aid procedures; decontamination procedures and housekeeping.

Lockout/Tagout			
72	Lockout/Tagout	6:52	To protect workers, equipment scheduled for maintenance needs to be "Locked Out" and/or "Tagged Out" so that it will not operate. Procedures for using Lockout/Tagout.
74	Lockout/Tagout: Open and Shut Case (SPANISH)	14:00	This program helps solve the mystery of lockout/tagout by focusing on the basics. It will help your company comply with OSHA 1910.147 and avoid catastrophic accidents. Topics include: what lockout/tagout is and when to perform it; OSHA's six steps to controlling hazardous energy and OSHA's three steps for safe restoration of energy.
Heat Stress			
13	Beat the Heat (SPANISH)	17:00	Heat stress sounds like a minor inconvenience, but for those workers who must perform their jobs in the heat, heat stress can cause bodily illness or injury, worksite accidents and even death. Topics include thermo-regulation of the body, importance of replenishing fluids, prevention and treatment.
50	Heat Stress	9:22	More illnesses are surfacing from employees working in abnormally high temperatures such as in a hot warehouse or warm assembly environment. This video discusses heat stroke, heat stress, fainting and precautions to take when working in a hot environment.
Miscellaneous Safety Information			
5	All Washed Up	5:00	A secondary line of contamination defense in the workplace is the emergency shower and eyewash unit. Learn how and when to use them. Comes with post-video test
8	Avoiding Poisonous Plants	11:10	Teaches viewers how to identify poisonous plants, how to protect against accidental exposure and what to do it exposure occurs.
24	Destination Safety	5:00	Gumshoe detective Joe Entrencher solves a case of increased accidents at the Acme Companies. His solution: A safe workplace begins with safety-conscious employees. Comes with post-video test
55	High-Impact Metal Working Safety (SPANISH)	19:00	This program re-creates ten industrial accidents involving heavy machinery and metal work to illustrate the necessity of following proper safety procedures and maintaining a good safety sense. The program participant will learn how to safely operate brake presses, grinders, metal cutting shears and other machines.
59	Housekeeping: General Work Space	5:00	Clutter in the workplace can often get in the way of safety. The importance of keeping an orderly work area to keep hazards at a minimum is stressed. Comes with post-video test.
64	I Felt Comfortable	23:00	This tragic true life story is about Randy Fellhoelter and the conditions which led up to his narrow escape from death. Randy tells his dramatic story to an audience of co-workers and its impact can be felt as well as viewed. Randy discusses how our attitude about taking risks can affect our lives and those of our families and friends. Some of the scenes in this high impact video are very graphic and may not be suitable for all audiences. Scenes of Randy's injuries were taken at the hospital and during his recovery. This video should be seen by all employees, supervisors, and managers.
76	Maintenance Person Safety	15:47	This video serves as a quick reminder of safety issues important to maintenance personnel.
81	On-the-Job Safety for Custodians	26:36	Increase employees' awareness of the dangers of preventable accidents. Includes back injury prevention, ladder safety, chemical safety PPE, labels, MSDS, trip/slip hazards, power and hand tool safety, and asbestos.
110	School Teacher Safety Orientation	16:00	Increase educators' awareness of safety issues while introducing topics of interest to your staff. Includes bloodborne pathogens, hazardous chemicals, emergency preparedness, electrical safety, drug/alcohol policies, child abuse and sexual harassment.
127	Violence on the Job	27:00	This video discusses the effects of violence on safety and health and ways to prevent and reduce violence in the workplace.
Hotel/Motel & Kitchen Safety			

57	Hotel Housekeeping Safety	12:10	Encourage housekeeping staff to protect guests and themselves. Topics include: safe lifting techniques, pushing carts; chemical safety- MSDS, labels, quantities; bed-making and bathroom cleaning safety.
58	Hotel Maintenance Safety (SPANISH)	11:55	Hotel maintenance personnel perform a broad range of tasks and potential hazards and they must know how to work safely in all situations. This video was designed to enable workers to identify potential hazards and take the steps necessary to avoid the hazard or take steps to remedy the hazard before an accident or injury occurs.
67	Kitchen Safety	12:48	Explains machine safety, slips/falls, chemicals, knives, food slicers, electrical safety, and information necessary to prevent equipment and food preparation accidents and injuries. OSHA Compliant.
Landscape Safety			
68	Landscape Safety	5:00	Discusses wearing proper PPE, using an inspection checklist and shows special precautions for string trimmers and chainsaws.
70	Landscape Maintenance Safety (SPANISH)	16:00	More about landscape maintenance personel safety.
Personal Protective Equipment			
1	A Foot Closer to Safety	3:42	Short video highlighting the different types of safety footwear available for the workplace.
39	Eye Injuries	5:00	Injuries to the eye can happen instantly. Graphically depicting such injuries is the method used to encourage proper eye protection. Comes with post-video test.
43	Foot Safety	12:00	Our feet provide us with balance and support for our bodies and enable us to walk, run, drive, operate machinery, play sport and so on. This program addresses why people injure their feet, common types of foot injuries, steps to prevent foot injuries, evaluation of foot injury hazards, control measures for existing hazards, safety footwear. Falling objects cause the largest number of foot injuries in the workplace; there are however numerous other potential hazards that can lead to injuries. This program is aimed at all personnel who may come into contact with any of these hazards.
52	High-Impact Eye Safety (SPANISH or ENGLISH)	19:00	Show your workers that failure to wear proper eye protection often results in permanent vision loss! Most eye injuries can be prevented by simply wearing proper eye protection. Your employees will make a new commitment to eye safety when they see real injuries recreated in the video.
53	High-Impact Hand Safety (SPANISH or ENGLISH)	17:00	Vividly re-creates 15 hand and finger injuries to show the viewer the effects of unsafe work practices. While the program graphically illustrates each accident, it also presents the causes and prevention measures for each one. The program will force the viewer to think about the value of his hands and how fragile they can be if neglected or left unprotected.
80	On Solid Ground - A Plan for Safe Excavation and Trenching	18:50	Designed to provide a summary of the OSHA requirements for excavating and shoring and examples of methods companies may follow to establish an effective excavation and trenching safety program.
83	Personal Protective Equipment: Overview *	5:00	Personal protective equipment can help orevent many types of injuries. Choose PPE that matches the hazard encountered, and follow instructions for proper use and care. Comes with post-video test
89	Respiratory Protection: A World Apart (SPANISH)	23:00	This video will help your facility comply with OSHA 1910.134 and help workers avoid exposure to hazardous airborne substances that can lead to serious health effects and other chronic illnesses. Topics include: OSHA's Respiratory Protection standard, hazardous atmospheres, types of respirators and fit testing.
90	Respiratory Safety Training (SPANISH)	25:00	Provides viewers with a basic understanding of how the respiratory system works, common types of respiratory hazards, common causes of respiratory problems and correct use of respiratory safety equipment. Also included are details regarding updated OSHA and NIOSH respirator fit testing and cleaning protocols.
120	Personal Protective Equipment	19:20	The goal of this program is the ensure the safety and health of workers by providing the knowledge and skills they need to properly use and care for personal protective equipment provided to them.

128	Where are Your Hands?	3:33	This video discusses the importance of being aware of your hands' locations at all times to prevent injury to them.
130	Training Program: Personal Protective Equipment - An Assessment and Training Program		This program discusses personal protective equipment, it's necessity, limitation, use, care and mainenance. The video comes with an instructors guide and employee handbook.
Slips and Falls			
82	Personal Fall Arrest Systems	5:00	A personal fall arrest system can reduce the chance of inquiry when a fall occurs. Know your equipment and its limitations, as well as proper anchoring and tie-off techniques. Comes with post-video test
99	Slippin' and Trippin'	5:37	Slips and Falls/Causes and Preventions: Injuries from slips and falls are the second highest workmen's compensation claim in the country today. Spilled oil, leaky containers, dropped tools, torn carpeting, and loose wires all contribute to a hazardous workplace. This video illustrates ways to prevent hazardous situations and encourages workers to do their part to keep work areas clean and free of debris.
100	Slips, Trips and Falls: Real Life (SPANISH)	17:38	Falls account for almost 400,000 workplace injuries each year. This video will teach your workers to be aware of potential dangers and minimize serious injury on the job. Topics include: awareness, attitude, action; identifying hazards; minimizing improper use of equipment; simple housekeeping.
Spanish Language			
13	Beat the Heat (SPANISH)	17:00	Heat stress sounds like a minor inconvenience, but for those workers who must perform their jobs in the heat, heat stress can cause bodily illness or injury, worksite accidents and even death. Topics include thermo-regulation of the body, importance of replenishing fluids, prevention and treatment.
14	Bloodborne Pathogens for Non-Healthcare Employees (SPANISH)	11:47	All employees, even those that are not considered high-risk, must become aware of the hazards of bloodborne pathogens. Topics include: transmission routes; preparation for emergencies, and first aid; housekeeping and waste disposal; definition of bloodborne pathogen, HBV, HIV, AIDS.
15	Bloodborne Pathogens for Manufacturing (SPANISH)	12:00	This program explains what bloodborne pathogens are, how they may affect workers and how to prevent exposure. Topics include exposure possibilities, exposure prevention, and cleaning and sanitizing.
17	Bloodborne Pathogens: Protect Yourself (SPANISH)	15:00	This program is designed for workers who are not designated to respond in an emergency but may contract bloodborne pathogens as first-on-the-scene good samaritans, housekeeping employees or laundry staff. Topics include: HBV, HIV and AIDS; how these diseases are spread; first-aid procedures; decontamination procedures and housekeeping.
26	Don't Be a Dummy About Back Safety (SPANISH)	14:00	In this video from our "Don't Be A Dummy" Series, employees (and dummies) return to work for Back Safety Awareness Day. Our dummies suffer several painful back injuries despite the company's effort to make employees aware of the actions they can take to prevent them. Embedded in these injuries is a message to viewers: back injuries don't happen to dummies; they happen to real people who ignore basic back safety practices. Topics include components of the spine, causes of back injuries, back strains and sprains, and the importance of exercise and posture in maintaining a healthy back.
45	Grinding and Abrasive Wheels (SPANISH)	11:00	Grinding can be a safe job or a hazardous job. Why the difference? If you ignore safety and proper grinding procedures, you turn a safe job into one that is extremely dangerous. This program is intended to make personnel who use grinders more aware of safety when operating grinders.
48	Hazard Communications (SPANISH)	19:00	Designed to provide important information about safe work practices when working with hazardous chemicals. Topics include: awareness, attitude and action; MSDSs; and exposure limits.

51	Herbicide Selection & Safe Use (SPANISH)	14:00	An in-depth examination of safe and effective weed control, with emphasis on in-field safety: special site and environmental factors; choosing equipment, clothing and herbicides; storage, disposal and spills of herbicide.
52	High-Impact Eye Safety (SPANISH or ENGLISH)	19:00	Show your workers that failure to wear proper eye protection often results in permanent vision loss! Most eye injuries can be prevented by simply wearing proper eye protection. Your employees will make a new commitment to eye safety when they see real injuries recreated in the video.
53	High-Impact Hand Safety (SPANISH or ENGLISH)	17:00	Vividly re-creates 15 hand and finger injuries to show the viewer the effects of unsafe work practices. While the program graphically illustrates each accident, it also presents the causes and prevention measures for each one. The program will force the viewer to think about the value of his hands and how fragile they can be if neglected or left unprotected.
54	High-Impact Hazard Communication Training (SPANISH or ENGLISH)	19:00	The eight accident re-enactments in this video show viewers that failure to understand chemical hazards on the job often results in horrific, life-altering injuries. The video stresses the point that workers must follow all safe work procedures outlined in the company's Hazard Communication program to prevent tragedies such as these. Training topics include reading container labels, understanding Material Safety Data Sheets, selection and use of PPE, proper storage of chemicals, health effects of exposures, routes of entry, emergency evacuation and warning signs.
58	Hotel Maintenance Safety (SPANISH)	11:55	Hotel maintenance personnel perform a broad range of tasks and potential hazards and they must know how to work safely in all situations. This video was designed to enable workers to identify potential hazards and take the steps necessary to avoid the hazard or take steps to remedy the hazard before an accident or injury occurs.
70	Landscape Maintenance Safety (SPANISH)	16:00	More about landscape maintenance personel safety.
74	Lockout/Tagout: Open and Shut Case (SPANISH)	14:00	This program helps solve the mystery of lockout/tagout by focusing on the basics. It will help your company comply with OSHA 1910.147 and avoid catastrophic accidents. Topics include: what lockout/tagout is and when to perform it; OSHA's six steps to controlling hazardous energy and OSHA's three steps for safe restoration of energy.
84	Portable Grinders & Abrasive Wheels (SPANISH)	13:00	Grinders and abrasive wheels are common and dangerous tools. If improperly used, grinders can explode like hand grenades. This video explains safe use, procedures, and maintenance of grinders and abrasive wheels.
88	Pro-Active Safety Attitudes: Target Zero (ENGLISH OR SPANISH)	17:00	Zero accidents in the workplace is a possibility - and it all starts with a vision. This video uses astronaut Buzz Aldrin to emphasize the importance of pro-active safety by reminding us there was once a time when the possible seemed impossible! Topics include: accident prevention, building trust and maintaining leadership.
89	Respiratory Protection: A World Apart (SPANISH)	23:00	This video will help your facility comply with OSHA 1910.134 and help workers avoid exposure to hazardous airborne substances that can lead to serious health effects and other chronic illnesses. Topics include: OSHA's Respiratory Protection standard, hazardous atmospheres, types of respirators and fit testing.
90	Respiratory Safety Training (SPANISH) †	25:00	Provides viewers with a basic understanding of how the respiratory system works, common types of respiratory hazards, common causes of respiratory problems and correct use of respiratory safety equipment. Also included are details regarding updated OSHA and NIOSH respirator fit testing and cleaning protocols.
100	Slips, Trips and Falls: Real Life (SPANISH)	17:38	Falls account for almost 400,000 workplace injuries each year. This video will teach your workers to be aware of potential dangers and minimize serious injury on the job. Topics include: awareness, attitude, action; identifying hazards; minimizing improper use of equipment; simple housekeeping.
117	Training Program: Forklift Safety Compliance Package (ENGLISH/SPANISH)		In an effort to decrease the staggering number of injuries and fatalities, OSHA finalized the new Powered Industrial Truck Standard (1910.178). This Forklift Compliance Package offers you the chance to comply with the latest training requirements. The compliance package includes two video programs, an employee handbook that corresponds to each video program and a Compliance Guide.

122	Training Program: Forklift – Lift Truck (ENGLISH/SPANISH)		This program is about safety training. It will not provide operational training on your specific forklift or powered industrial truck. Topics include: OSHA’s forklift safety requirements, basic safety precautions for driving in facilities, proper procedures for safe load handling, and safety precautions for special situations such as mechanical breakdowns and operation in hazardous environments.
Training Programs - These videos come with additional materials to aid in training.			
112	Training Program: Coaching the Experienced Driver - Defensive Driving Course		Comprehensive coverage of collision prevention techniques and issues, including: cushion of safety, scanning, vehicle positioning, following and stopping distances, backing and parking procedures, and others. Comes with Response Book, Leader's Guide, and written test.
113	Training Program: Computer Ergonomics - The Joyce Institute Approach	31:00	Ergonomic strategies for computer users to help prevent injuries and increase productivity. Produced by the Joyce Institute, internationally-recognized specialist in ergonomics training and consulting, this new program demonstrates "do-it-yourself" strategies for improving comfort. This program illustrates a broad range of computer uses; highlights ergonomics workstation issues in offices such as lifting and storage; and focuses on low-cost/no-cost solutions that work. Comes with Leader's Guide and Participants Guide.
117	Training Program: Forklift Safety Compliance Package (ENGLISH/SPANISH)		In an effort to decrease the staggering number of injuries and fatalities, OSHA finalized the new Powered Industrial Truck Standard (1910.178). This Forklift Compliance Package offers you the chance to comply with the latest training requirements. The compliance package includes two video programs, an employee handbook that corresponds to each video program and a Compliance Guide.
119	Training Program: Machine Guarding - A Management & Equipment Safety Program		More OSHA citations are given for machine guarding violations than for lockout/tagout, confined spaces, and hazardous materials combined. Machine guarding also consistently tops the list of fine amounts. Clearly, our machines are not as safe as we think they are. This training program helps employers develop a machine guarding safety program to prevent such fines and, even worse, employee injuries. Comes with Employee Handbook, Risk Evaluation Form, Instructors Guide, and Training Preparation Guide.
121	Training Program: Practical Accident Investigation Series		Investigation of accidents and incidents involves the methodical examination of an undesired event that did, or could, result in harm to people, damage to property or loss to process. Investigating all accidents/incidents, as outlined in this program, contributes to the identification of the basic causes, corrective actions and preventative controls. This program consists of four videos: The Initial Response, Gathering Evidence & Information, Analysis & Correction, and The Scenario Reel. Comes with Discussion Leader's Guide and Participants Worksheets.
122	Training Program: Forklift – Lift Truck (ENGLISH/SPANISH)		This program is about safety training. It will not provide operational training on your specific forklift or powered industrial truck. Topics include: OSHA’s forklift safety requirements, basic safety precautions for driving in facilities, proper procedures for safe load handling, and safety precautions for special situations such as mechanical breakdowns and operation in hazardous environments. Comes with Facilitator Guidebook, and Participant Workbook in spanish and english
123	Training Program: Speed & Space Management (Trucking)	9:15	Arm your drivers with the speed and space management "know-how" they need to avoid accidents. Proper speed and space management on the part of your drivers can go a long way toward keeping your accident rate - and your costs - low. This kit will give your drivers solid information on proper control of speed and "safe space" maintenance. It will also remind your drivers of what can happen when speed and space management is not practiced. The kit's fast-paced, 12-minute video features 3-D animation, dynamic sound, and upbeat music to capture and hold your drivers' attention. The video also features practical advice from veteran drivers and other industry professionals to add credibility and a "real-life" dimension. Comes with Instructor's Bulletin and Driver's Skill Card.

124	Training Program: Winter Driving	12:00	When old man winter comes to town, motor vehicle accidents increase dramatically. Icy roads, cold temperatures, and snow dramatically change everyone's driving environment. Our expert stunt drivers demonstrate safe driving techniques during inclement weather conditions. Keep your employees safe and reduce winter driving incidents with this exciting program. The video includes: following and stopping distance; braking and skid control; driving on inclines; braking safely; parking lots and potential hazards; vehicle maintenance and inspection. Comes with Facilitator Guide and Employee Handbook.
129	Training Program: Accident Investigation in the Workplace: Supervisor Training and Employee Awareness		This program examines accident investigation for both employees and supervisors. It focuses on understanding the significance of accident investigation, the role of the investigator, gathering data, interviewing witnesses, and compliance with company policies and OSHA regulations. The program consists of 2 videos as well as workbooks for employees and supervisors.
130	Training Program: Personal Protective Equipment - An Assessment and Training Program		This program discusses personal protective equipment, its necessity, limitation, use, care and maintenance. The video comes with an instructor's guide and employee handbook.
131	Training Program: Hazard Communication - Training for Employees		This program covers chemical inventory, MSDS, labels and labeling. The video comes with an instructor's guide, employee workbook, and handouts.
132	Training Program: Forklift Safety - An Operator Training Program		This program covers forklift safety procedures, safe forklift operation, pre-operation, load handling, fueling, battery change/charge, and maintenance. The video comes with a course preparation guide, employee handbook, and checklists.

Supervisor Development Program

20	Communication Skills for Supervisors	7:36	Sharing company news with employees. Fair, frank, and private employee evaluations. Establishment of an open door policy. Refusal to play favorites.
60	How to Communicate – The Basics for Supervisors	5:00	Topics include: communication vs. simply talking; using gestures, signals, body language, listening skills, and feedback; and handling complaints from employees.
62	How to Set Up & Maintain a Training Library	41:00	Full step-by-step advice, money-saving tips, and smart moves that will help you get your training library started on the right foot and remain useful for years to come.
63	How to Train with Video	27:00	This program will train you to train with video. You'll learn what to look for when purchasing a video program. You'll learn how to use them effectively, how to generate enthusiasm for the programs, and how to monitor your people's progress so you know what works.
71	Life is for Living: Safety Meeting Opener	3:00	This 3-minute video is designed to open or close employee safety meetings and help focus the viewer's attention on the long-term consequences of injuries. It also illustrates how seemingly minor actions can lead to serious injuries. A wide variety of dramatic mishaps are powerfully illustrated, such as traffic crashes, slips and falls, hand injuries, back injuries, eye injuries and electrical mishaps. The powerful conclusion will leave a lasting impression on viewers.
95	Labor Management Safety Committees	15:00	Only half of all safety committees achieve what employees and managers anticipate: causes of failure/poor performance of committees; developing policies, procedures and goals; problem-solving, not problem-giving; tasks on which committees can concentrate.
104	Supervisor Safety Responsibilities *	5:00	Supervisors are key figures in a company's safety effort. Learn steps supervisors can take to help ensure a safe workplace and protect employees they supervise from illness and injury. Comes with post-video test

105	Supervisors' Development Program: Employee Safety Training		New employees and transferring employees who are already familiar with a job need safety training. Video discusses the importance of safety training in preventing accidents and injuries using a four-step approach called "Job Instruction Training".
106	Supervisors' Development Program: Hand Tools and Portable Power Tools		Emphasizes that using the right tools <u>and</u> training workers to use them properly can prevent accidents and injuries.
107	Supervisors' Development Program: Environmental Management		Discusses the importance of everyone's role in protecting the environment. Without everyone's involvement, it is a time bomb, ready to explode at any time.
109	Supervisor's Role in Hiring & Firing	20:00	Ensures that supervisors follow legal and fair hiring/firing practices. This video includes: planning the hiring interview, providing company policies and job description, documentation of evaluations and terminations.
114	Training Program: Accident Investigation for Supervisors	25:00	Cover an in-depth accident investigation from start to finish. Train supervisors to develop the "hands-in" skills needed to conduct faster, more thorough and better-organized investigations: Initial response to an accident; collecting evidence. Determining cause of accident. Preventing future accidents.
133	Supervisor's Development Program: Hazard Communication		This video discusses hazard communication, including hazard determination, developing a written program consisting of labels and MSDS, and OSHA regulations.
134	Supervisor's Development Program: Safety Inspections		This video discusses safety inspections including their purpose, control of hazards, loss prevention, and types of inspection
135	Supervisor's Development Program: Communications/ Human Relations		This video discusses communication with employees and management. It includes methods and style of communication and responses to employee and management communication
136	Supervisor's Development Program: Industrial Hygiene		This video focuses on prevention of occupational injury and illness through assessment and evaluation of the workplace and employee complaints.
137	Supervisor's Development Program: Machine Safeguarding		This video focuses on accident prevention through machine safeguards by ensuring proper operation and prevention of contact with dangerous components of machines.
